test_5 32 1.0 8.0 SeqCode by E. Blanco [Sat Jun 5 20:47:00 2021] 0.6 0.4 0.2 0.0 -5000 PEAK +5000 REGION

This plot is generated by counting the number of reads along this region for each

Figure legend. Heatmap of ChIPseq reads around the center of the peaks.

represents the region around the peak center in which the counts were calculated peak to display these values on different rows of the heatmap. The X-axis

ChIP intensity on this region. PEAK represents the center of the peaks. On the for each peak. The Y-axis represents the list of peaks ranked by the average right, ChIP signal range from high (top) to low (bottom). Number of reads: ChIPseq experiment: Number of peaks: test_5

21482

Flanking sequence: Window factor: 2000
